

We Delivered. And Now We Need Your Help.

By Anna Von Reitz

In recent weeks The Living Law Firm has accomplished some miracles.

We have delved out a simple process that average people can use to completely correct their political status records, reclaim their identity, and return home to their natural permanent domicile on the land and soil of the organic states.

We have put a giant Private Registered Indemnity Bond in place for each state of the Union, which people can use to protect their homes and land from bogus foreclosures, providing the "First Ever" simple DYI systemic answer to mortgage fraud.

We have taught people how to lawfully stop paying taxes they don't owe and how to defend themselves from IRS attacks.

Better still, we have taught them how to use the services of the IRS to turn the tide and enforce claims against the racketeers who have been defrauding Americans for generations.

Every week, corrupt judges get bounced off the bench. Corrupt attorneys lose their bar cards. And none of them are eligible for rehire.

We have turned the ABA/IBA commercial lien over for collection.

Bit by bit and day by day, we are helping to drain the swamp, educate Americans, and doing our yeoman's service to defend our countrymen.

We have discovered the "Smoking Gun" that proves high level collusion aimed at robbing the American people of their homes via foreclosure and credit fraud in the offices of INTERPOL and the USAG and the Wells Fargo Bank and the local Bar Associations that have allowed "judges" to foreclose with one hand and buy back foreclosed homes with credit lines based on the victim's own home equity with the other.

We have tracked down the mechanisms of the identity theft and fraud at the very root of all the problems now facing our people and our country. We have dismembered the generation skipping trust tax shelters and insurance schemes at the very core of this vast criminality.

We have devised the means to safely deflate the mortgage bubble. We know how to repair the trade deficit. We have gathered together nine of the largest Historic Trusts to bulwark the American economy and provide our country with continuing liquidity in the midst of global transition.

We have provided the means and guarantees to make sure that veteran pensions and Social Security payments continue no matter what happens to the UNITED STATES or the USA, INC.

We have established the first sovereign chartered International Trade Bank in 150 years and opened the way through bank treaties for the worlds of commerce and international trade to communicate again. We have cleared the way for average people to have safe and honest private banking services available in the not so distant future.

We have faithfully espoused and supported the educational and organizational effort to rebuild and restore the lawful American government one county at a time, one state at a time.

Through our work, through our publications, through our research, we are bringing relief and hope and much-needed remedy to millions of people.

It is one of the most daunting, most hair-raising adventures anyone could imagine, a sort of Gobi Desert trek across wastelands populated by criminals and madmen and yet also populated by some of the most righteous, kindest, and wisest people in the world.

We are standing here in the midst of that desert without two brass shekels compared to the immensity and ever-expanding nature of the work we have taken on, and the bills are piling up for members of the Living Law Firm and the Asset Recovery Team and the Michigan General Jural Assembly and The American States and Nations Bank.

We are all volunteers. Nobody draws a salary. We can't possibly do this without your help, your prayers, and your material support.

Please send what you can, if you can. I am still acting as Paymaster, Chief Bottle Washer, Judge, Doctor, and Grandma.

One thing is for certain--- we can't just stand around waiting for some "grand tomorrow" or some magical RV to fall out of the sky. If we want it, we've got to make it happen. Everything we have accomplished so far has been done the hard way and when we look each other in the eye, we all know that we have to build that "tomorrow" today.
